

USB 3.0 to HDMI Adapter

The USB 3.0 to HDMI Adapter is a device which enables connection to second display device to a computer using USB 3.0 port. With this convenient design, it can connect up to 6 display devices to a computer without installing extra video cards. Once the driver has been installed, the USB attached monitor will be enabled immediately. No function key on the adapter and there is no need to reboot the operating system after unplugging the USB adapter. System performance is an important issue when using multiple monitors. Another benefit of this adapter is that it occupies little computer resource; ensuring users get quality display without comprising computer performance.

* Incorporates HDMI® technology.

Features

- Add-on monitor, LCD or projector through a single USB 3.0 port hot plug; add or remove monitor without system reboot
- Small in size, works with all HDMI displays.
- Supports resolution up to 2048x1152
- Video streaming is supported up to 1080p
- Supports up to 6 USB display adapters to work simultaneously
